

Take the plunge. *DIVE* deep into transformational leader development that yields sustainable growth and results. This program features high levels of accountability and provides leaders the time and space to implement desired and needed changes.

We lead by virtue of who we are. Many seasoned leaders face constant and significant challenges. They tell us that over time, they lose a sense of identity in their work. *DIVE* is personal development designed to reconnect a leader to his or her core, illuminate that core for the first time, or help a developing leader set a trajectory to sustain him or her during the opportunities that lie ahead. *DIVE* is for those who know they could be more effective if they could get in sync with their internal compass.

DIVE starts with a unique 2 day intensive one-on-one retreat, followed by steady personal leadership development to assist in building and maintaining the structure for inside-out growth. This process usually takes 12-15 months with connection to a leadership coach 1-2 times per month. Frequent and targeted accountability ensures transformational shifts.
