

Reach your peak. The Leadership DNA Summit is a *one-on-one leadership development* retreat over a two-day period designed to identify core leadership competencies and develop a strategic plan for continued personal development. In a relaxed, reflective, and engaging format, leaders *explore turning points* in their life to provide insights into their method of negotiating life leadership. Our wholistic approach helps participants reach personal & professional goals, achieve business objectives, and sustain leadership effectiveness throughout their lifetime.

Most leaders want to be great. Often, the leaders we work with are overcoming conflict far more than riding on success. This robs them of their passion and focus & diminishes their effectiveness more rapidly than most realize. The *Leadership DNA Summit* is designed to expose leaders to their blind spots, help them become comfortable with their leadership limp, and teach them to leverage their uniquely crafted strengths in order to more effectively lead their teams and achieve their business objectives and professional & personal goals.

The *Leadership DNA Summit* is an intense 2 day one-on-one experience facilitated like a personal retreat. A DNA Summit Coach guides the leader through a discovery process using dynamic inquiry, powerful questions, and leadership formation process tools. By investing in the Summit, leaders gain purpose-based leadership focus and strategic actions in five specific areas. This wholistic approach ensures the participant is able to sustain leadership effectiveness for a lifetime.
